

I have two daughters.

I have a promising career.

I have meth addiction and depression.

But most of all... I have hope.

The first time I used meth I was 22. I felt so good about myself, like I could do anything. I was hooked. I was smoking a quarter gram a day when I got arrested with an eight ball. That's when the party ended.

I got the help I needed. And today, I'm Back on Track.
